The Patented One-of-a-Kind MaxJax® Portable Car Lift Safety Features from the Ground Up No one in the industry has a more sophisticated and comprehensive research and quality control program than MaxJax, and our thousands of customers worldwide prove it. Low-pressure HVLP Direct-Drive cylinders eliminate the need for lifting chains or screw mechanisms most commonly found on other lift designs. Hydraulic cylinders feature integrated velocity-fuse safety valves. A robust, gear-type flow divider precisely distributes hydraulic pressure providing consistent, equalized lifting. Rugged safety lock bars are capable of holding three-times the rated lifting capacity. Arm restraints automatically engage each time the lift is raised. Detailed installation, maintenance and safety instructions accompany each MaxJax car lift. MaxJax encourages all owners to know their equipment and to follow good safety practices when using any of our products. Your MaxJax car lift equipment has been designed and built with your safety in mind, but the ultimate responsibility for safe operation is with you, the operator.
