Headlight Beam Setter - Digital

- Some modern cars have headlights that use Matrix, DLA and ILS beam technology to improve driver visibility while at the same time reducing glare for oncoming traffic and pedestrians. Improved road safety is achieved by specifically targeting where the light does/doesn't reach. This new technology requires special equipment to test and calibrate the headlights. The new 'tecnolux digital headlight beam setter is the answer and in conjunction with a scan tool will ensure correct calibration and performance. Camera Software features:
- Available Reading: halogen, xenon, LED, low beam, high beam, fog beam
- Beam pattern: European left/right hand driving, USA, Japan
- Communication Protocol: Net1, Net2, Giegnet, GiegLan, OTC Lan
- Software Update: USB Key, LAN configuration through RS232
